PROFINO

Much more than just nice things.

At PROFINO, we have made it our mission to offer products that feel good, look good and enrich everyday life. We are always on the lookout for well thought-out To-Go products and kitchen utensils that impress.

We offer a unique range in the lifestyle, urban living, sports, kitchen and tableware segments.

Over 1,000 products from 16 well-known international brands are stored in our central warehouse in Solingen, from where they are also dispatched.

Our own products, such as drinking bottles and thermo mugs, have recently been added to our range - driven by the team's many years of experience in storing hot and cold drinks.

Sustainability in particular has become increasingly important to us in recent years: the desire to do something more for our environment has grown within our team. Our idea: when you buy a PROFINO bottle or a PROFINO thermo mug, we donate a tree to the organisation „**Plant for the Planet**“.

You can read more about the organisation from page 18 onwards.

Our launch range impresses with its design, benefits and quality. The bottles and mugs have ergonomically designed openings, are leak-proof, easy to clean and are dishwasher - safe.

Both fit easily into handbags and sports bags, as well as drink holders on bicycles and in cars.

Infuze

Water bottle with infuser, 0.60l

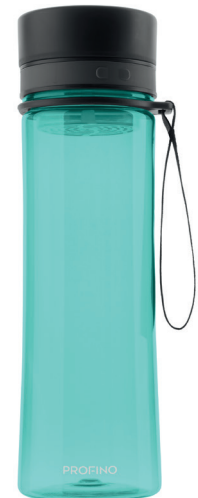

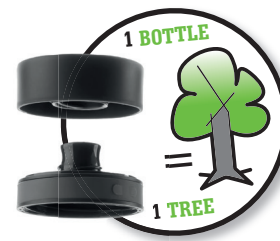

Infuze

Water bottle with infuser 0.60l

The Infuze bottle is both stylish and practical and is available in a simple, transparent or coloured design. The two-part screw-on lids and the removable infuser impress with their convenient mouth opening, which makes drinking effortless and drip-free. The lids are uniformly grey/black and are therefore interchangeable.

Product features:

- leak-proof screw cap
- infuser insert for filtering tea or fruit
- large opening for easy filling and cleaning
- comfortable, wide mouth opening
- made from Tritan, a resistant plastic that does not absorb stains or odours
- BPA-free and dishwasher-safe

BPA FREE

The PROFINO Infuze water bottle is stylish, lightweight and made from Tritan - a high-quality, flavour-neutral plastic.

Infuze KIDS

Water bottle with infuser, 0.35l

Infuze KIDS

Water bottle with infuser 0.35l

Our Infuze KIDS is stylish and practical at the same time. This transparent Tritan bottle is available with stylish graphic themes. The 2-piece screw-on lid and the removable infuser score points with the convenient mouth opening, which makes drinking effortless and drip-free.

Product features:

- leak-proof screw cap
- infuser insert for filtering tea or fruit
- large opening for easy filling and cleaning
- comfortable, wide mouth opening
- made from Tritan, a resistant plastic that does not absorb stains or odours
- BPA-free and dishwasher-safe

KIDS Elefant

 EAN: 4260293172334
 RRP: **12,95 €**

BPA FREE

The PROFINO Infuze KIDS water bottle is stylish, lightweight and made from Tritan - a high-quality, flavour-neutral plastic.

PROFINO

Sparkle

Bottle for sparkling drinks, 0.70l

Sparkle

Bottle for sparkling drinks
0.70l

The PROFINO Sparkle water bottle is stylish, lightweight and made from Tritan, a high-quality, flavour-neutral plastic. The curved base of the bottle makes it ideal for carbonated drinks. The two-part construction of the body makes it easy to drink through the convenient mouth opening, as well as making it easy to fill and clean the bottle.

Product features:

- ✔ classic bottle design
- ✔ suitable for sparkling water and other carbonated and non-carbonated drinks
- ✔ two-part screw cap – unscrew top for easy drinking, unscrew bottle neck (mid section) for easy filling and cleaning
- ✔ convenient mouth opening
- ✔ BPA-free and dishwasher-safe

PROFINO

Barista

Mug for coffee or tea

Barista

Mug for coffee or tea 0.25l

The PROFINO Barista vacuum mug is the practical companion for On-The-Go. Thanks to the height of the mug it fits perfectly under various coffee machines. The high-quality, double-walled stainless steel body keeps coffee and tea hot. Perfect for drinks On-The-Go.

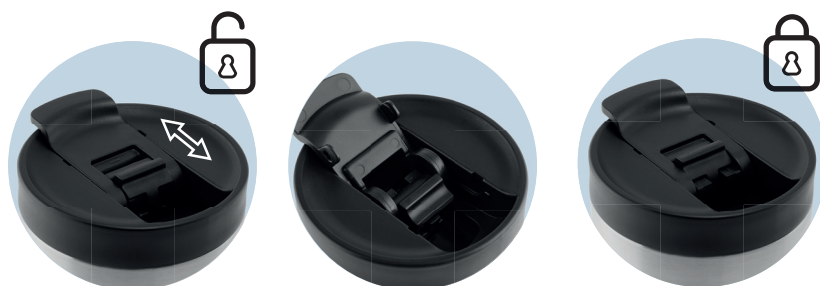

The lid of the mug is leak-proof thanks to the double-lock system, so that the mug can also be easily transported in a bag.

Product features:

- fits under standard espresso and coffee machines
- leak-proof thanks to double lock closure
- keeps liquids hot for up to 2 hours / cold for up to 4 hours
- easy to clean thanks to the large opening
- BPA-free and dishwasher-safe

The double lock system:

open ...

... enjoy...

... lock!

Stop talking. Start planting.

Every few years, the clock hand is moved further forward, first it was five to twelve, then twelve, now we correct every minute and realise that twelve o'clock is long behind us. The climate crisis is looming ahead. We have to act, across the board, everyone, industry, politics, private households.

This is „Plant - for - the - Planet“

Plant-for-the-Planet develops solutions to tackle the climate crisis. The foundation has partner organisations on four continents and makes it possible for children and young people to train each other as ambassadors for climate justice in academies. The organisation also supports renaturation projects and is actively involved in forest protection and the restoration of rainforests in Mexico.

Plant-for-the-Planet was founded in 2007 by the then 9-year-old Felix Finkbeiner.

Renaturalisation and protection of ecosystems

Plant-for-the-Planet Mexico is restoring cleared forests on the Yucatán Peninsula to the highest possible ecological complexity. In the neighbouring Balam-Kú reserve, Mexican colleagues are involved in forest conservation and have already been able to create many green jobs in the region.

Empowering children and young people

Through its academies, Plant-for-the-Planet has created around **100.000 ambassadors for climate justice worldwide**. In the one-day workshops, 9 to 14-year-olds deepen their knowledge of the climate crisis, train each other in rhetoric and learn how they can take action themselves.

This shows results: many ambassadors get involved in the public debate on the climate crisis, give talks, give interviews and meet decision-makers. This is another reason why Plant-for-the-Planet sends a delegation to the annual World Climate Conference.

Every purchase of a PROFINO drinking bottle or vacuum mug supports the organization Plant-for-the-Planet by donating a tree.

Why is it so important to plant trees?

There used to be around 6 trillion trees on this planet. So far, half of the trees have been cut down, leaving only 3 trillion trees. Of course, we could regrow the 3 trillion trees that have been cut down, but then we would lose land that is needed to grow food. So we can't restore all 3 trillion lost trees.

But there is good news: we can restore up to 1 trillion trees without reforesting agricultural land.

Once these trillions of trees have grown, these new forests could bind between 488 and 1012 billion tons of CO₂.

This corresponds to approx **1/4 to 1/3 of all human CO₂ emissions to date (2.2 trillion tons).**

Technology

Without high-tech, it is difficult to observe the many millions of planted trees.

That's why Plant-for-the-Planet developed different apps:

- You can donate trees worldwide with the web app (www.pp.eco).
- The TreeMapper.App can be used to track the growth of trees.

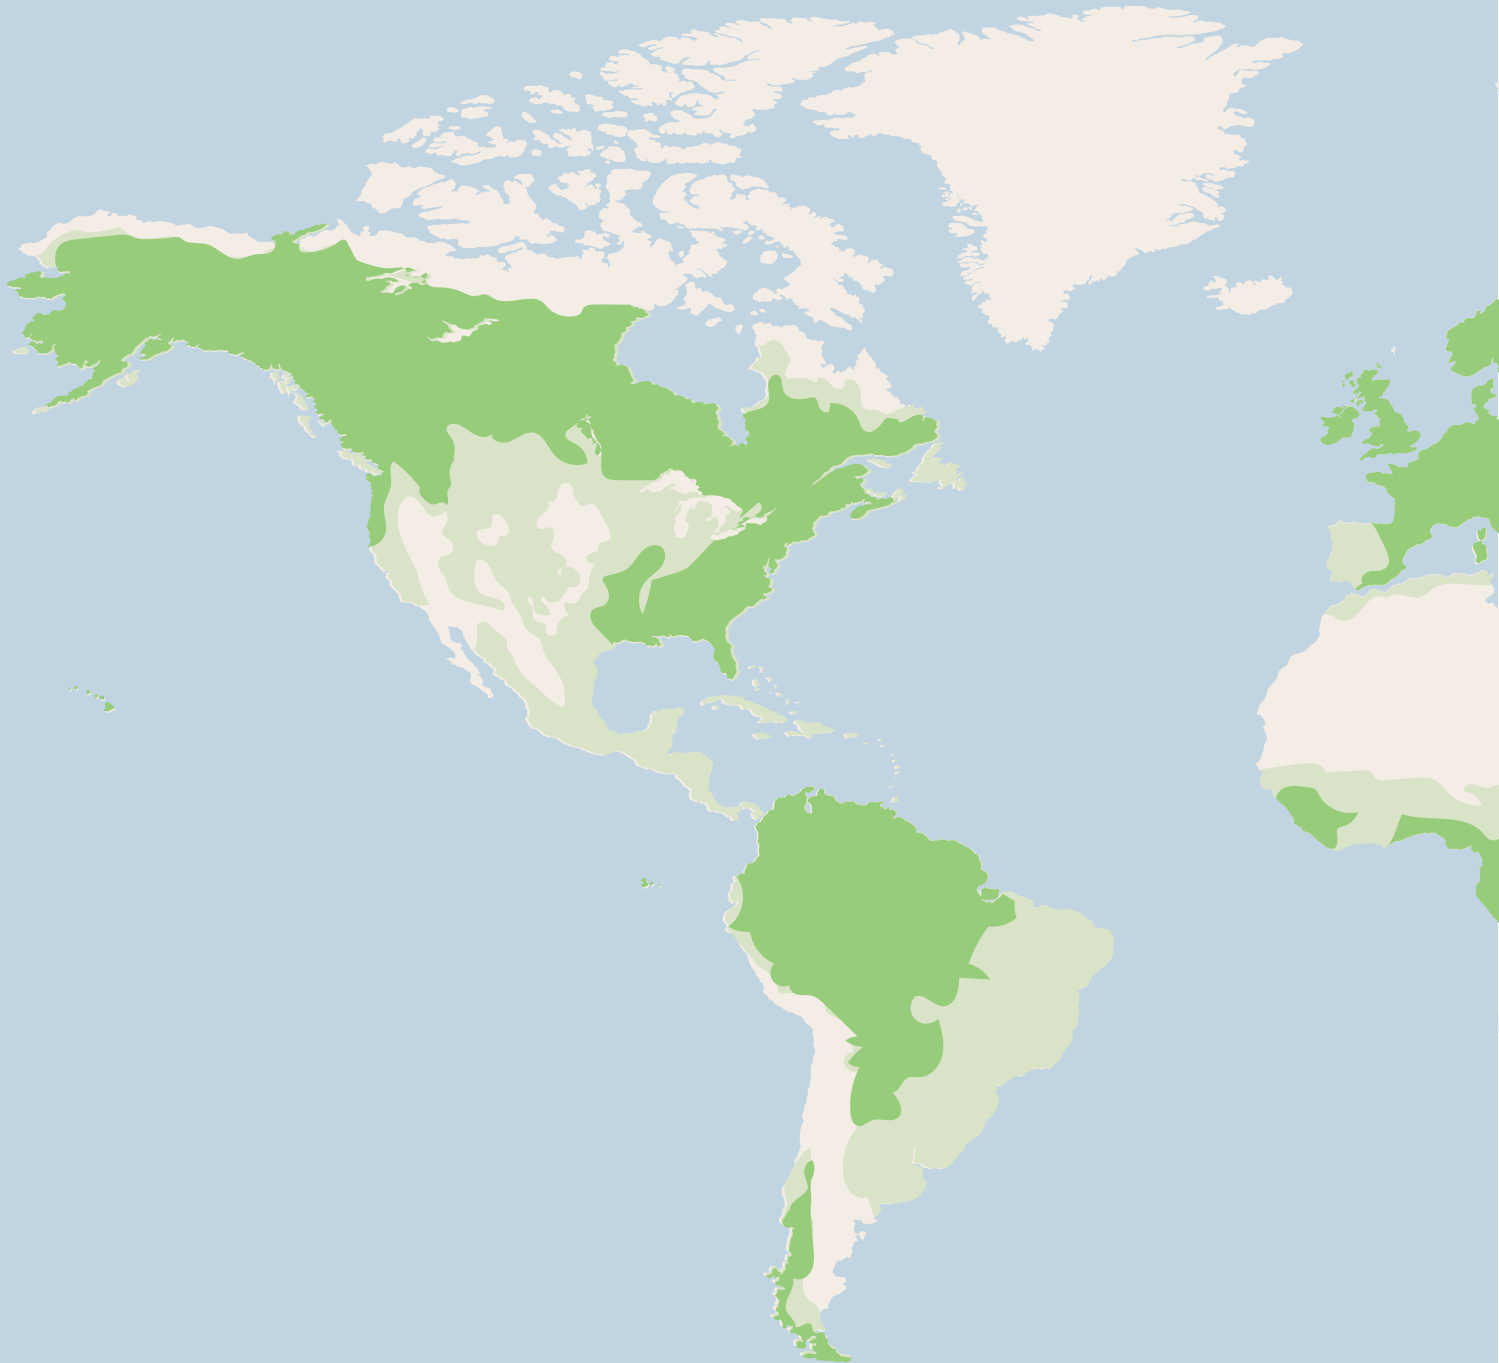

- The FireAlert-App makes it possible to fight forest fires much faster by using satellite data from NASA. In this way, Plant-for-the-Planet makes it easier for donors and supporters of restoration projects to keep an eye on and protect the trees.

All applications are free of charge for renaturation organizations. Also free of charge is the renaturation advice offered by Plant-for-the-Planet.

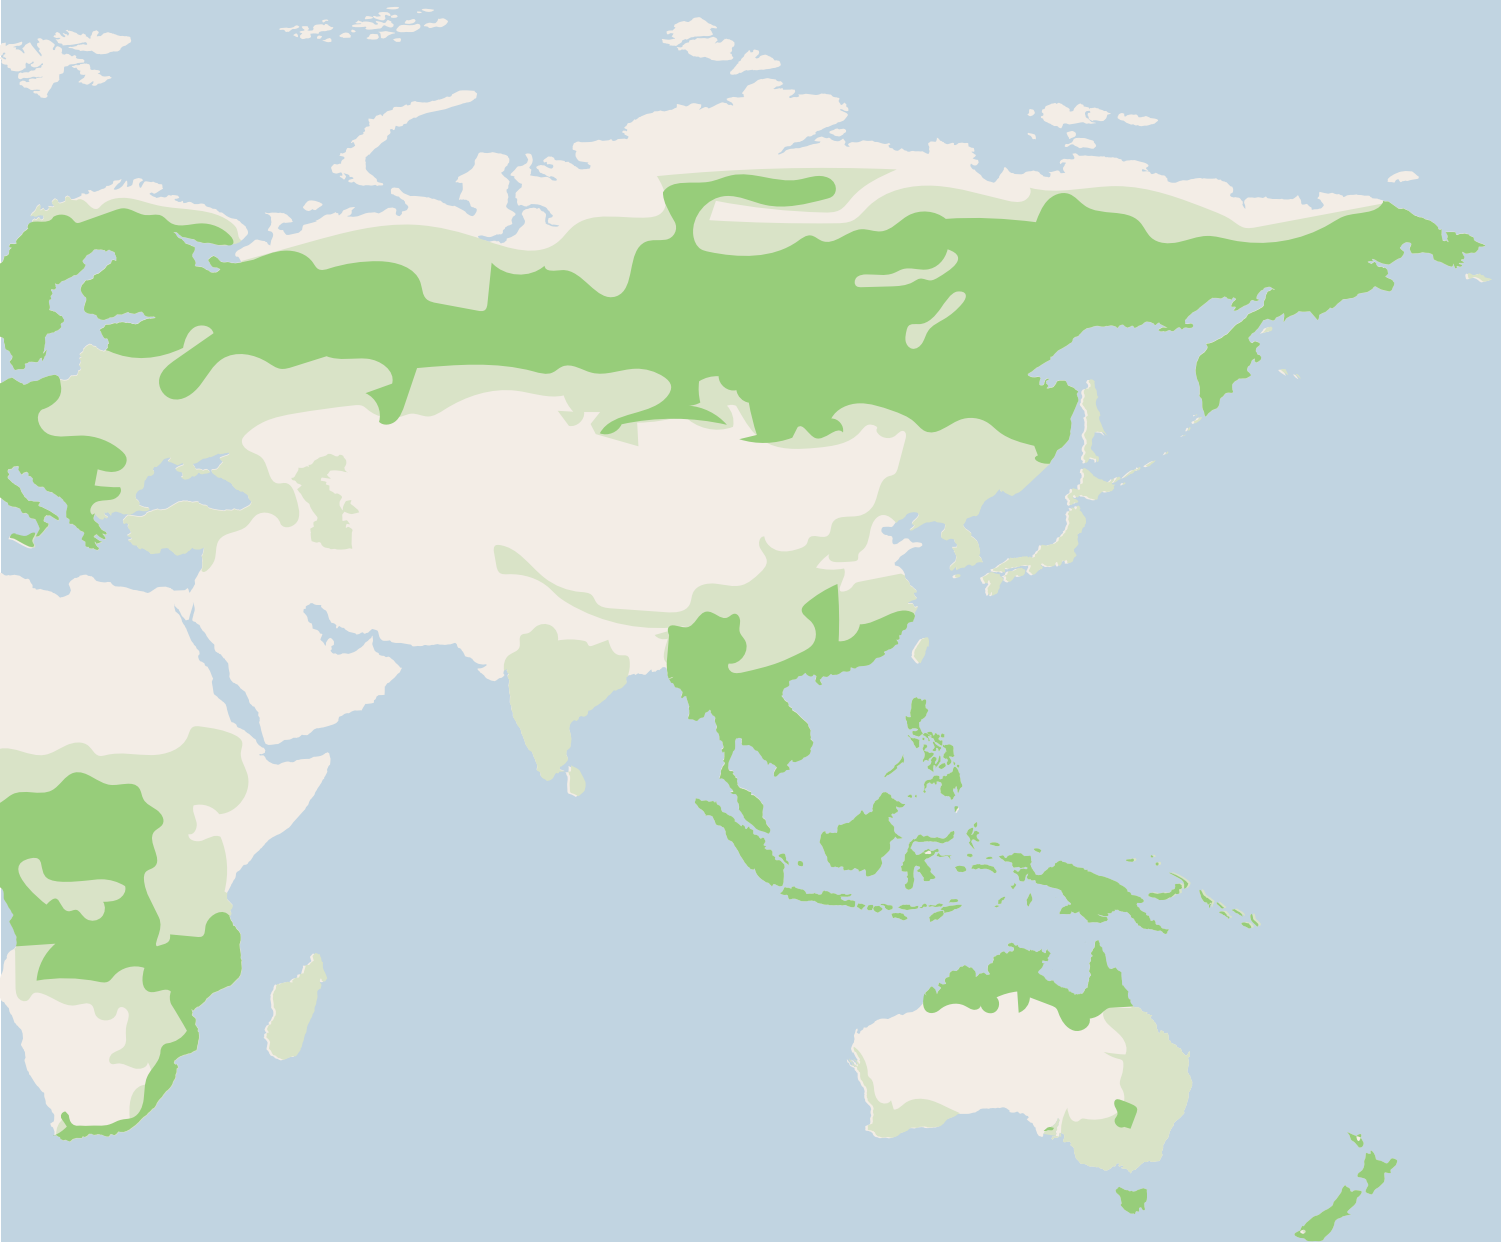

Tree distribution around the world

There are currently **3.000 billion trees** growing in the world and there is still room for **1.000 billion** more. They are one of the most effective natural tools to buy us time in the fight against the climate crisis. Only by restoring these forests will we be able to keep the temperature rise below 1.5°C.

- Tree population: 3.000 billion
- Tree population: 4.000 billion

With the purchase of a PROFINO drinking bottle or a PROFINO vacuum mug, **a tree is donated to the organization Plant-for-the-Planet** to help restore the trees on our planet..

The problem with plastic waste

Every year, **4,8 to 12,7 million tons of plastic** end up in the world's ocean.

This is a major problem, as it can take several thousand years for the plastic to decompose completely. Until then, the plastic breaks down into smaller and smaller particles, known as microplastics.

Microplastics in particular are a major problem in the oceans and waters of our world, as they can be mistaken for food, e.g. plankton, by marine animals. If the microplastics get into the bodies of marine animals, the particles can also enter the human organism through their consumption - what happens then and what consequences this can have is not yet entirely clear. What is certain, however, is that additives such as softeners or flame retardants harm marine animals. [2]

Reusable instead of disposable!

More than **18 million tons** of annual packaging waste in Germany could be reduced by switching to reusable packaging. This also applies to the many billions of coffee-to-go cups per year, which, if stacked on top of each other, would reach the moon. [3]

Environmental problem: Coffee To-Go

In Germany, 2.8 billion disposable cups are used for takeaway drinks every year.

Around 1.7 billion of these disposable cups are the typical coffee-to-go cups made of cardboard, while the remaining 1.1 billion cups are also made of plastic and are available from vending machines.

But even a paper cup is not just made of cardboard: This is because the cups are coated so that the hot drinks do not soak through the cardboard. Each paper cup consists of up to 7% plastic, which can be found in the coating of the cardboard. [4]

The most environmentally friendly solution instead of using paper or plastic cups with lids is to use your own mug or thermo mug. These are usually made of durable stainless steel or Tritan and can be used for a long time thanks to the durability of the material.

The advantages of reusable bottles

Reusable bottles have many advantages. Firstly, they are environmentally friendly, since using such bottles reduces the need for disposable plastic bottles and therefore reduces the environmental impact of plastic waste. In addition, reusable bottles are more cost-effective in the long term because they can be used several times and over several years.

Most reusable bottles are made of glass, stainless steel or Tritan. Tritan has the advantage that the plastic is very robust and still transparent, but is not very heavy.

They are ideal for the school bag, sports bag or for on the go!

Tritan - a plastic just like any other?

Tritan is a recyclable plastic that is often used for the production of food-safe reusable packaging. Tritan is lightweight, unbreakable, flavour-neutral and also dishwasher-safe and heat-resistant.

The plastic is free from harmful plasticizers such as bisphenol a (BPA) or other hormonal substances and has been classified as non-hazardous to health by both the EFSA (European Food and Safety Association) and the FDA (Food and Drug Administration). [5]

The fact that Tritan is very easy to sterilize means that the material has ISO 10933 approval, which deals fundamentally with the subject of biocompatibility. [6]

Stay hydrated!

Especially in summer, it is important to supply the body with water, as the body releases the accumulated heat when sweating. The sweat evaporates on the skin, which helps the body to cool down. However, if the increased need for water cannot be met, this can have serious consequences.

Dizziness, headaches, nausea and difficulty concentrating are just some of the symptoms of dehydration.

Long-term dehydration can increase the risk of cardiovascular disease and be responsible for an increased heart rate, reduced cardiac output and falling blood pressure levels. [7]

The recommended average water and fluid intake is 2 liters per day.

If you are physically active, e.g. through sporting activities or intensive physical work, you should ideally drink an additional 1 liter. [8]

PROFINO believes longevity saves resources.

Replacement lids, seals and other spare parts are available for all our drinking bottles and mugs so that you can use your bottle or mug for as long as possible.

You can request spare parts at service@profino.de or obtain them from your retailer.
